

### Introduction

HE2012B series Humidity stability storage cabinet is a humidity stability storage device with purification function which is develop , produce and sale by HUATO. It activity regulate and control the inside environment, making sure the humidity inside is within preset range. By equipped a smart automatic water intake module developed by HUATO, the condensed water from dehumidification can be vaporize automatically. With automatic water intake module, moisture inside can be condensed automatically and fill in inside tank, providing water for humidification. It's fully unattended.

### Humidity stability storage cabinet

Auto water intake

Precise humidity control

High control precision

stable humidity

wireless monitoring and control platform

### Features

- Stylish appearance, highly stable and reliable;
- With large inside space, various articles can be put inside
- Excellent airtight design, with magnetic sealing strip, prevent air leaking from over loading.
- The paint uses for the sheet metal of the cabinet body is without acid and methanal.
- It's paint lasts, and the paint is non-toxic, high in hardness, scratch resistance and aging resistance.
- 4 retractable wheels are installed on the bottom, making it easier to move the cabinet.
- Equipped with LCD display, showing inside temperature and humidity values.

### Specification

Material	Spcc	Power supply	220V / 50Hz
Process	Thermal spraying	Average power	50W in 25°C
Carrying capacity	Single Floor:150KG Total:1500KG	Size	W1200*D780*H2100MM (H2200MM if added wheels)
Accessories	Power cable, funnel, antenna , pipe, humidity control device		

### Standard accessories

### Typical applications

Widely use in fields that needs stable temperature and humidity environments.
