HUATO

Introduction

HE17X temperature and humidity data logger is featured with elegant appearance, IP67 standard of waterproof and dustproof, multiple levels of accuracy, energy-saving design and USB interface. It is specifically designed for refrigerators and cold-chain transportation.

HE170

Features:

- Switchable ℃ or ℉.

- Waterproof and dustproof standard IP67. resisting moisture and dust.

- Temperature and humidity limits can be set by users. LED light flash when the limits is exceeded.

- Ultra-low energy consumption; 1/2AA 3.6V Lithium battery can work for 12 months.

- Download data to PC through software and can be saved in different formats to ensure data safety.

- Used high sensitive sensors with fast response and high accuracy.

Model List		
Model	HE170	HE171	HE172
Temperature accuracy	±1℃（±1.8℉）	±0.5℃（±0.9℉）	±0.3℃（±0.6℉）
Recording capacity	43000		
Measuring range	-30~+70℃
